**Leggere il brano e rispondere alle seguenti 10 domande. (021 - 030)**

*SkyWay Monte Bianco*

*Skyway Monte Bianco, the new Mont Blanc cableways, allow you to depart on a magical journey to discover majestic landscapes and live an unforgettable experience.*

*As walking for long distances is not required, this experience can be enjoyed by almost everyone, unless health problems make it difficult to stay at high altitudes. The cable cars rotate a full 360 degrees along the route, giving a full view of the surrounding peaks.*

*The three stations, Pontal d'Entrèves at 1,300 m, Pavillon du Mont Fréty at 2,200 m, and Punta Helbronner at 3,466 m, are connected by two cableway sections, which are protected spaces built in glass and steel that harmonize with the surrounding environment. The departure station of Pontal d'Entrèves is an aerodynamic-looking structure with large outdoor car parks. Inside are information areas, bars, an infirmary, and ticket offices, in addition to the technicians who look after the powerful engines that drive the cable cars.*

*The intermediate station, the Pavillon du Mont Fréty, offers a panoramic view on the opposing sides of the Val Veny and Val Ferret, helped by the large glass surfaces of the buildings. On the outside, there is a botanical garden, several walking routes to get close to nature, and a solarium; on the inside, there are two restaurants, a bar, a 150-seat meeting/ events/cinema room, a Mont Blanc crystals exhibit, a small shopping centre, and a winery. The old station will be renovated and converted into a museum area.*

*The last station is Punta Helbronner; which is shaped like a crystal. The main attraction here is a circular scenic terrace 14 metres in diameter with a unique all around view over most of the highest peaks of the Western Alps: Mont Blanc, Monte Rosa, the Matterhorn, the Gran Paradiso and the Grand Combin. Inside, there is a crystal exhibition hall, a self service restaurant, a bar, and multimedia information points. Numerous multimedia screens located in all the stations inform tourists about the history of the place. Even in bad weather, coming here will not be a problem because it will be a rewarding visit and an unforgettable experience where breathing "thin air" will not be the only memory.*

*Down a vertical tunnel, excavated in the heart of Punta Helbronner, there are safety staircases and elevators that connect with the pedestrian tunnel leading to the Torino mountain hut, since there is no stop near the mountain hut. Once on the top, only during the summer, do not miss the Panoramic Mont Blanc gondola lift ride over the Glacier du Géant to the French station Aiguille du Midi at 3,777 m.*

**021. This experience ...**

- A) includes a lot of walking.  
C) can help with health problems.

- B) is for most people.  
D) includes a stay on Mont Blanc.

**022. The Skyway Monte Bianco ...**
